American Psychiatric Association Publishing, United States, 2014. Paperback. Condition: New. Language: English. Brand new Book. Transference-Focused Psychotherapy for Borderline Personality Disorder: A Clinical Guide presents a model of borderline personality disorder (BPD) and its treatment that is based on contemporary psychoanalytic object relations theory as developed by the leading thinker in the field, Otto Kernberg, M.D., who is also one of the authors of this insightful manual. The model is supported and enhanced by material on current phenomenological and neurobiological research and is grounded in real-world cases that deftly illustrate principles of intervention in ways that mental health professionals can use with their patients. The book first provides clinicians with a model of borderline pathology that is essential for expert assessment and treatment planning and then addresses the empirical underpinnings and specific therapeutic strategies of transference-focused psychotherapy (TFP). From the chapter on clinical assessment, the clinician learns how to select the type of treatment on the basis of the level of personality organization, the symptoms the patient experiences, and the areas of compromised functioning. In order to decide on the type of treatment, the clinician must examine the patient's subjective experience (such as symptoms of anxiety or depression), observable behaviors (such as investments in relationships and deficits in functioning), and psychological structures (such as identity, defenses, and reality testing). Next, the clinician learns to establish the conditions of treatment through negotiating a verbal treatment contract or understanding with the patient. The contract defines the responsibilities of each of the participants and defines what the reality of the therapeutic relationship is. Techniques of treatment interventions and tactics to address particularly difficult clinical challenges are addressed next, equipping the therapist to employ the four primary techniques of TFP (interpretation, transference analysis, technical neutrality, and use of countertransference) and setting the stage for...
